## **STUDENTS AND PERSONAL ELECTRONIC DEVICES**

The Board of Education recognizes that students may have personal electronic devices that can perform different functions. Such devices include “internet-enabled devices” defined as: any smartphone, tablet, smartwatch, or other device capable of connecting to the internet and enabling the user to access content on the internet, including social media applications, but do not include any such device supplied by the district for educational purposes. Other personal electronic devices include devices which are not capable of connecting to the internet and access content on the internet including fitness trackers, wireless headphones and earbuds, e-readers, voice recorders, non-school issued cameras, and non-school issued music devices.

These devices can create significant distraction to the school environment, negatively impact student mental health, contribute to disciplinary infractions, and reduce student engagement. Additionally, in an emergency, the use of personal electronic devices can distract students from following the directions of staff or emergency responders, contribute to the spread of misinformation, create congestion in the emergency response system, and interfere with the district’s emergency response protocols.

### **Device Access Policy and Storage**

As required by Education Law §2803, this policy prohibits student use of internet-enabled devices during the school day (including all classes, homeroom periods, lunch, recess, study halls, and passing time) on school grounds (any building, structure, athletic playing field, playground, or land contained within the boundary of a school or district or BOCES facility), unless under an exception (e.g., IEP/Section 504 or as permitted below).

1. At the elementary school level, students are discouraged from bringing devices to school. Any device that is brought to school must be silenced and stored as directed by the building administrator.
2. At the middle school level, student devices must be silenced and stored as directed by the building administrator.
3. At the high school level, student devices must be silenced and stored as directed by the building administrator.

Generally, the district is not responsible for stolen, lost, or damaged personal electronic devices brought to school.

### **Communication with Parents/Guardians**

During the school day, to minimize distractions, parents/guardians may contact their children by calling the school office and/or the district-provided email address. The district will notify parents/guardians in writing of the communication protocol at the beginning of each school year and upon enrollment.

## **Exceptions for Specific Purposes**

Use of internet-enabled devices must be permitted where included in a student's Individualized Education Program, Section 504 plan, or where required by law.

Additionally, the district permits the use of internet-enabled devices in the event of a personal/family emergency and under the following circumstances:

1. Where necessary to manage a student's healthcare (e.g., diabetes, asthma, medication, etc.);
2. For translation services; and/or
3. For students who are routinely responsible for the care and wellbeing of a family member (on a case-by-case basis, upon review and determination by a school psychologist, school social worker, or school counselor). The administrator makes the final decision after consultation with student support staff.

Parents may request an exception for their children to use internet-enabled devices during the school day as listed above. Requests must be made to the Building Principal, and for healthcare exceptions, must include documentation from an appropriate healthcare professional.

Under any of these exceptions, devices may only be used for the purposes outlined in the exception, and the device must be silenced and put away when not in use, to the extent compatible with the reason for the exception.

Where the district provides students with one-to-one devices, personal electronic devices are not permitted for educational purposes.

## **Enforcement, Consequences and Reporting**

Enforcement of this policy is chiefly the responsibility of building administrative staff; however, all designated employees are expected to assist in enforcement. Students will be reminded of this policy regularly and consistently, especially at the start of the school year and after returning from breaks.

For students out of compliance with this policy, enforcement and consequences will be addressed through the Code of Conduct. In addition, administrators will discuss with students and their parents/guardians the aims of this policy, the benefits of a distraction-free environment, the reasons the student had difficulty following this policy, and how the district can help the student contribute to a distraction-free environment.

The district may not impose suspension from school if the sole grounds for the suspension is that the student accessed an internet-enabled device as prohibited by this policy. However, the district may utilize consequences under the district's Code of Conduct.

Some uses of personal electronic devices may constitute a violation of the school district Code of Conduct or other district policies, and in some instances, the law. The district will cooperate with law enforcement officials as appropriate.

Beginning September 1, 2026 and annually thereafter, the district will publish an annual report on its website detailing the enforcement of this policy over the past year, including non-identifiable demographic information of students who have faced disciplinary action for non-compliance with this policy and an analysis of any demographic disparities in enforcement of

this policy. If a statistically significant disparate enforcement impact is identified, the report will include a plan to mitigate such disparate enforcement.

## **Electronic Devices and Testing**

To ensure the integrity of testing, in accordance with state guidelines, students may not bring cell phones or other electronic devices into classrooms or other exam locations during all testing.

Test proctors, monitors, and school officials have the right to collect cell phones and other prohibited electronic devices prior to the start of the test and to hold them for the duration of the test taking time. Admission to the test will be prohibited to any student who has a cell phone or other electronic device in their possession and does not relinquish it.

Students with Individualized Education Plans, Section 504 Plans, or documentation from medical practitioners specifically requiring use of electronic devices may do so as specified.

## **Policy Distribution and Translation**

As required by law, the district will post this policy in a clearly visible and accessible location on its website. Upon request by a student or parent, the district will translate this policy into any of the twelve most common non-English languages spoken by limited-English proficient individuals in the state, as identified by the most recent American community survey published by the U.S. Census bureau.

The district will also include this information, or a plain language summary, in student/family handbooks.
